

# Fluency in the Most Useful AI Tools for Law Firms

*Making your legal practice smarter and easier*

You likely are using, or *being used*, by artificial intelligence, every day—even if you're not aware of it. From Netflix recommendations to self-driving cars, AI is all around us. But what kinds of AI products should lawyers be using in their practices? And how can those same lawyers assure that they are using those tools in a secure, and ethical, fashion?

You may have more options for AI products than you think, including LegalTech tools. In this program, we run down what those choices look like, as well as how to use those products in practice, including how to supervise your staff when they use them. We've got real-life attorneys who use AI to streamline their legal work. AND we've also got an ethics lawyer to keep us all in line!

In this program, we lay out your modern, AI technology platform—that is, until everything changes: right after the program ends!

## Agenda

- General Business AI Tools for Law Firms
- AI in LegalTech
- Legal Operations That Can Be Refined or Streamlined Using AI
- The Intersection of AI and Legal Ethics

## Faculty
